Wireframing

Components - Neumorphism (Cards)

- Block or “card” used to contain content
- Block is styled to give the impression it is extruding from the background
- Implemented using contrasting border colors

Light Shadow
#FFFFFF at 50%
X: -6, Y: -6, Blur: 16

Main Background:
#EFEFEE

Shape Background:
#EFEFEE

Optional Border:
#FFF at 20% Alpha

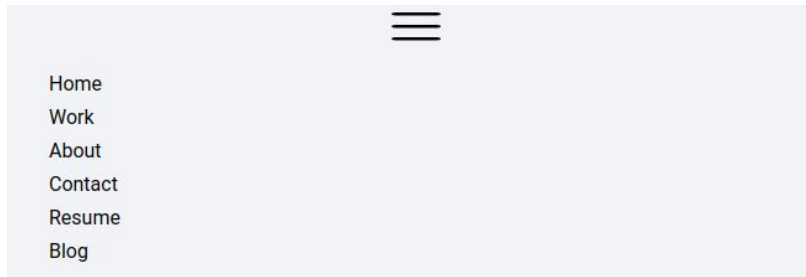

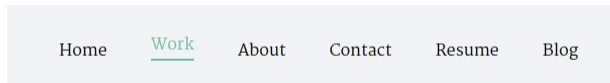

Dark Shadow
#D1CDC7 at 50%
X: 6, Y: 6, Blur: 16

Components - Neumorphism (Icons)

CSS Animations

- Navigation hover
- Typewriter effect
- Icon hover

Responsive Design (Grid & Flexbox)

- Flexbox: used to position cards within the context of the body
- Grid: used to position individual components within cards
 - Grid layout varies based on screen width (media queries)

Branches - Purple Theme

Hey,

Branches - Dark Theme

Challenges

- Naming HTML and CSS elements in a consistent format
- Balance between wanting to write clean code and getting things to work within the given timeframe
- Finding which CSS properties and attributes to use to accomplish a given task

Lessons

- Spend the time to plan things out thoroughly before writing any code
- The “art” of reading documentation
